Route of birds from Alto Mayo

This route is, with no doubt, the most spectacular bird route of Peru and one of the most interesting and diverse of the planet with more than 500 species to be possibly watched. Alto Mayo also offers the possibility of watching and taking pictures of the more than 62 species of hummingbirds thanks to the existence of many observatories of these species all along the route being the wonderful star the hummingbird Cola de Espátula.

The altitude variation that goes from 2300 m.a.s.l. of Abra Patricia to 850 m.a.s.l. of Moyobamba in just 121 km. has contributed to the development of different ecosystems highly biodiverse allowing the existence of a big number of endemic or unique species in the world, standing out the hummingbird Cola de Espátula, Long-whiskered owlet, the hummingbird Royal Sunangel, ocher front toloroi, brown toloroi, among others.

The most representative places that are part of this spectacular route are: Huembo Lodge, Owlet Lodge of Abra Patricia, Fundo Alto Nieva, Sendero Royal, The Protection Forest of Alto Mayo (Llantería), White Sand, Aguajales and Renacales of Santa Elena, Morro de Calzada and the ACP Waqanki.

Attractions of the route

Photo: Heing Plenge

Preservation center Waqanki

It's a place of private preservation, which belongs to the family Altamirano. It is located at the outskirts of the city of Moyobamba, near Km 3 of the road Moyobamba - Jepelacio. They have a touristic shelter designed for birdwatching. Besides, they have gardens and drinkers appropriate for attracting hummingbirds. In a complementary way, they also have a garden of orchids. The place is visited by almost every birdwatcher that goes to Moyobamba.

Among the species we can find we have Mosquerito de Mishana (Mishana Tyrannulet), Frutero Garganta de Fuego (Fiery-throated Fruiteater), Saltarín Cabeza de Fuego (Fiery-capped Manakin), Zorjal de Várzea (Varzea Thrush), and Coqueta de Cresta Rufa (Rufous-crested Coquette).

Activities you can do

- Birdwatching
- Orchids watching

Services you can take

Accommodation, food, tourist orientation

Morro de Calzada

It is in an Area of Preservation and Recovery of Ecosystems, managed by the City Hall of Calzada. Located near the Km 483 of the road IIRSA North. It is a place of great importance on the North Birds Road. Here there have been registered 424 bird species (e-bird 2020), being the most important for tourism Mosquerito de Mishana (Mishana Tyrannulet), Saltarín Pintado (Painted Manakin), Búho Negruzco (Stygian Owl), Tangara de Hombros Rojos (Red-shouldered Tanager), Jacamar de Frente Azul (Bluish-fronted Jacamar), Saltarín Cabeza de Fuego (Fiery-capped Manakin), among others. Its singular location and geography make it one of the most important bird shelters in the region of San Martín.

You can enter the city of Calzada by the road IIRSA North, then you take an unpaved road of about 2 Km until the gate of entry.

In this Route, we find Morro de Calzada Amazon Center in bird sighting points, research center, environmental education, recreation and reforestation, equipped for observation and photography of hummingbirds and tanagers; highlighting the following species: el Ermitaño de garganta negra, Colibrí de nuca blanca, Esmeralda de cola azul, Coqueta de cresta rufa, Zafiro de cola dorada, Tangara del paraíso, Tangara mexicana, Tangara de Cara Negra, Eufonia de Garganta Púrpura, among other species more.

Besides, other birds such as the Trogón de corona azul,

Jacamar de frente azul, Elanio plumizo, Tucán de pico acanalado, Tucancillo de Collar Dorado y La Moscareta de Mishana, among other species more.

Activities you can do:

- Walking
- Birdwatching
- Flora and fauna observation
- Camping
- Wood fire

3.

Birds route from **the seasonal dry forest of Huallaga**

It's not a very common ecosystem in this Amazon region for which its biological diversity, especially bird life, offers visitors exclusive specialties characteristic of this ecosystem. The attraction of this route are Ricuricocha Lagoon, Pucayaquillo Waterfall, Pumarrinri Lodge and the road Juan Guerra - Upaquihua Creek.

Route Attractions

Photo: Heinz Plenge

Ricuricocha Lagoon

A 2.5 Km del centro de la ciudad de Tarapoto. Se accede a ella a través de La Hacienda El Águila. Es una depresión natural que producto de las lluvias, forma una extensa laguna con una superficie de 850 000 m², con un perímetro de 7000 m, y una profundidad de 4 a 5 metros.

This lagoon has been formed by rainfalls, creating a mirror of 727,172.00 m², presenting an ecosystem of dry seasonal forest surrounded by trees of quinilla, bolaquiro, tangarana, pashaca and others.

This place is inhabited by diverse species of wild and ichthyological fauna. It is considered as a point of interest for birdwatching. The main bird species of the place are Pato Crestudo (Comb Duck), el Ermitaño del Planalto (Planalto Hermit), el Pato-silvador de Pico Rojo (Black-bellied Whistling-duck), Zambullidor Chico (Least Grebe), Carpintero de Pecho Moteado (Spot-breasted Woodpecker), among others.
